OBJECTIVE

Motivated Computer Engineering student interested in Hardware Design Verification, digital design, and verification methodologies. Strong foundation in OOP, data structures, algorithms, Python scripting, and programming, with practical exposure to physical design concepts. Seeking a junior or training opportunity to apply analytical and problem-solving skills, learn verification flows, and contribute to high-quality hardware and software projects.

EDUCATION

Birzeit University — Ramallah, Palestine

Bachelor's in Computer Engineering — Expected 2025

General Secondary Education — Scientific Stream

Average: 95.3

EXPERIENCE

Technical Trainer — HTML & CSS

- Trained students on web development fundamentals including HTML, CSS, and responsive design.
- Improved communication, mentoring, leadership, and presentation skills.
- Supported students in solving technical problems and understanding practical coding concepts.

Trainee — Physical Design, Orion Company

- Gained practical experience in physical design concepts and workflow.
- Learned basic digital IC design flow and hardware implementation concepts.
- Developed understanding of design constraints, timing concepts, and hardware design methodology.
- Improved analytical thinking and attention to detail through hardware-related training tasks.

PROJECTS

Physical Design Project

GitHub: https://github.com/aseelsaleh89/project_physical_design

- Worked on basic physical design flow and digital hardware design concepts.
- Gained exposure to RTL-to-layout flow, timing, constraints, and implementation steps.
- Applied problem-solving skills to understand design methodology and hardware workflow.

MVC Project

GitHub: <https://github.com/aseelsaleh89/projectdata>

- Developed an ASP.NET MVC application using C# and SQL Server.
- Implemented database operations and structured application logic.
- Applied OOP, data handling, and software design concepts.

React Front-End Project

GitHub: <https://github.com/aseelsaleh89/react>

- Built a React.js front-end application using reusable components.
- Applied JavaScript, responsive design, and modern UI development concepts.
- Practiced structured coding and component-based development.

Bootstrap Project

GitHub: https://github.com/aseelsaleh89/project_bootstrap

- Designed a responsive web interface using HTML, CSS, and Bootstrap.
- Focused on layout structure, usability, and responsive design.

TRAINING & COURSES

Front-End Development — Knowledge Academy

- Covered HTML, CSS, JavaScript, responsive design, and React.js basics.

Back-End Development — Currently Enrolled

- Learning back-end development concepts, REST APIs, databases, and server-side programming.

TECHNICAL SKILLS

Hardware & Verification:

Digital Design Basics, RTL Concepts, FSM Basics, Physical Design Flow, Hardware Design Methodology, Timing Concepts, Verification Concepts, Simulation Basics, Testbench Basics

Programming Languages:

C++, C#, Java, JavaScript, Python

Scripting:

Python Scripting, Basic Automation Concepts

Software & Web Development:

HTML, CSS, Bootstrap, React.js, ASP.NET MVC, Node.js, Express.js, REST APIs

Databases:

SQL Server, MongoDB, Entity Framework

Computer Engineering Concepts:

OOP, Data Structures, Algorithms, Problem Solving, Debugging, Analytical Thinking

Tools:

Git, GitHub, Visual Studio, VS Code

SOFT SKILLS

Communication

Teamwork

Time Management

Leadership

Training & Mentoring

Attention to Detail

Critical Thinking

Willingness to Learn

LANGUAGES

Arabic: Native

English: Intermediate
